

L2-L3 Test Pack Demo

Not presentable pass. Pure function and consistency test

L2 Bar

 image-20260515-202929.png

- Black Screen before conversation
- Black Screen Variable for WBP
- Conversation(control in 5 dialogue nodes)
Contains: Workable Level Sequence, Montage
- After Conversation: Hide CineSa, Interactable Female Client, Switch the dialogue for female client

New problem to be solved:

- Set Different New Conversation for Female Client Based on different Dialogue tree
- ~~Fix Interaction icon when approaching~~
- (Alternative to the above) Fix ISX Collision BP
- FixABP to make sure they can be both used for Sequence and Montage
- change optionB camera to level sequence because the animation is like shit!

~~Can't interact with Female Client(What's wrong?) i don't car~~

- Document these

Note

Is In Cutscene of a CineABP would influence:

1. *The Dialogue Style of Main Character(Or shared Component)*
2. *remove collision when Cine/Montage happens*
3. *add the collision back(For Pawn Only) in Gameplay*

- maybe use camera lock as substitute for most Level Sequence?
- camera lock
- Drunk Door Event
- Conversation with Drunk: Option A,B,C
 - A: TextBox+nothing
 - B: SideText+LegSweepAnm

C: SideText+ KickAnm
LevelSequence CamLock + AnimMontage

- Transition to L2Street

L2 Street

Supposely, a LS should be added as intro, but skip for this session

- BG LS+FightIntro
- Fight Intro LS
- ~~CineModeDialogue In LS~~ Use Audio Cue for Subtitle
- Add MPC for Lens Flare? (To Control how much lens flare is in the scene. An MPC only usable for Sequence)
- Fight
- After Fight LS
- Conversation after the LS (Control in 5 Nodes)
LevelSequence CamLock + AnimMontage
- After Conversation: Switch to L2 Tunnel
- Transition In Dialogue Mode: Action>Cine>Story

L2 Tunnel

- Play Cinematic
- Fix tunnel texture and model
- Add Bowerbird Tunnel Scene
- Bowerbird seq
- Re-render salute sequence

Tunnel LS

PTSD Flashback, warehouse, burning Bowerbird, bowerbird corpse, asylum, Media plane render

1. 2085 Sa animation(slow down at last frame)
2. mermaid corpse (glitch noise, underwater recording sound)
3. tunnel speeding (brightening, gets interrupted)
4. tunnel burning(bright, into hellish)
5. bowerbird(burning)

6. explosion

- Make PTSD Flashback in after effect
- After that, transfer to Sa_Apartment
- Add Emi Turn off on character shader for cine use
- Fix Sequence Anim Glitch(check the source FLS, not seem to be problem with the rearrange)
- Replace the mediaplane in the tunnel with MaterialPlane+Texture. Such a pain in the ass to use overalpping Media Plane

Combined Run

- Install all conversation/avt/montage
- fix narrative CineMode, Selection Pause Bug. Try Claude.
- Change display order if narrative plugin
- Idle pose, model swap debug
- In L2_Bar Street, add quest:回家。主要是测试quest终端和UI
- 打拳打输，被打死了之后的情况？怎么让玩家重来？
 - 包括：死亡UI，重来（暂定为按R重来）
 - 开打前自动存档？
- Autosave存档点？
- Redo Action HUD
- add subtitles to sequence
- Make sure all level elements connects with each other
- Level Transition smooth
- Audio First Pass after the rest is done

Only do the next after the previous levels are made

Sa Apartment

- Spawn as NakedSa, be able to interact with weardrobe(if being naked)>change clothes>Dressed Sa.
- Narrative：修改UI逻辑，让Monologue/Mail/Thoughts/Dialogue之间不会互相重叠和同时出现。
- Room Environment second Pass
- DawnToDay Change First Pass, Do it via Level Sequence.
 - PP blend
 - Skybox blend
 - Window (Mega,Big,Small)
 - LightChange
- Skywell Exterior Asset
- Set UP BPLM_SaApartment

Sa_ApartmentAlley

- FirstPass of Alley environment
 - Apartment building
 - Vending Machine
 - Cables, stains, fishbody
 - Huge Trashbin
 - Advertisement, Decal
