

Inventory-Gun System

Based On ISX Inventory System

Gun

-Actors: World Item(Plugins>ISX Content>ISX>Actors>World Item
(Place in World and load item class)

-Item Class(Content>Inventory>InventoryXBased>Items)

(Change **name** for switch on string in character blueprint)

(Provide change in Gun Model in character)

image-20250504-232455.png

In **Item Class** Blueprint>On use Item:

image-20250504-173644.png

Noted: The Pickup Gun Model is **different** from Actual Model in Character Hands

Pickup Model: Static Mesh(Created from Skeletal Mesh) (Needs to have collision to be interactable)

Model In Hands: Skeletal

(See Character BP part) Plug in Gun type in use Variable for ABP use

image-20250504-210426.png

Make Character Equipped On level start

Integrite below into level BP

For Weapon, change Use Item to Server Equip Item, and plug get to Item

image-20250530-184213.png

Integrate with Character

-CharacterBP

(Provide 1. Variable of Character using which Weapon(for ABP), 2. Change Fire Rate/Fire Animation Montage(UpperSlot))

1.Fire rate/Gun name

(Variable (SMG)Firing Rate: dps, number is in-between time for next bullet to shoot)

Touble Shooting: **Anim Replay for Auto Gun?** See below

-ABP

In Event Graph, connect with variable of Character(set in Item Class)

In Anim Graph:

Ammo

Change Stackable Number in Item, change actual pick up bullets amount in World Item

-In **Item Class**: Ammo of the gun

-In **World Item**: Amount=Ammo Count

In Gun BP:

Toubleshooting

-Anim Replay for Auto Gun

Make New Variables:

- `IsAutoFiring` (bool)
- `FireRate` (float, e.g., 0.1)

- FireTimerHandle (Timer Handle)
- SMGFireMontage (Animation Montage asset)

Insert Nodes in between in Character BP Firing part:
