

Sequence 结束后看向物体

尽量把这些做在LevelBP里。这样Target Actor可以确保是场景里的Actor。

 image-20260603-205317.png

如果你是用 Level Sequence Actor 播放：

```
Level Sequence Actor
→ Get Sequence Player
→ Bind Event to On Finished
→ Play
```

On Finished 绑定的 Custom Event 里调用：

```
BPLM → FinishLevelSequenceReturnToPlayer
```

传入：

```
ForceLookAtTarget = true
ReturnLookTarget = 你想让玩家看向的 Actor / TargetPoint
UsePitch = false
BlendTime = 0.3
```

顺序要这样：

```
Bind Event to On Finished
→ Play
```

不要先 Play 再 Bind。

Blueprint

BPLM
