Made a child BP of the Player dialogue node, then added a response type map that used gameplay tag and image, then created a dialogue response type of gameplay tag.

Make sure that BP Interface is applied in the class settings then opened the GetTexture function and got the image and plugged it in.

In **project settings**, down to Narrative Dialogues - Editor and changed the Default Player Dialogue Class.

In WBP_NarrativeButton_DialogueOption Event Graph, insert below between "Truncate the option if its too long" and "Update the hint text"
